WINDOW FURNISHING SOLUTIONS THAT BRING YOUR **DESIGNS** TO LIFE

TRUSTED SOLUTIONS FOR PROPERTY DEVELOPMENTS

WINDOW FURNISHING SOLUTIONS THAT
BRING YOUR **DESIGNS TO LIFE**

In the face of increasing pressure to design spaces that are high-performing, on budget, sustainable, and tenant-focused, developers, architects & contractors need trusted partners across their entire supply chain, that can deliver technically robust, aesthetically refined solutions - at scale.

At Renaissance, we supply premium curtain hardware and window furnishing systems that meet the functional and environmental demands of modern property development, with specifications that support BREEAM, Fitwel, and other key compliance frameworks.

Our product portfolio is built around durability, efficiency, and responsible sourcing. Systems are designed to support thermal comfort and daylight optimisation, enhancing occupant wellbeing and ESG reporting across residential portfolios.

Trusted by Moda Living, Taylor Wimpey, Quintain Living, and Bellway, we enable efficient fitouts with rapid lead times, fully labelled kits, and low-waste packaging that improves site efficiency and reduces installation impact.

WHY SPECIFY RENAISSANCE?

FOR ARCHITECTS

Complete technical drawings and specifications within 48 hours. Our hardware integrates seamlessly with your designs without compromise.

FOR DEVELOPERS

Transparent pricing structures that help you control costs from tender to handover.

FOR PROJECT MANAGERS

Reliable delivery schedules that protect your critical path. Pre-assembled solutions that cut installation time by up to 40%.

FOR INSTALLERS

Quick-fit systems with all components pre-sorted and clearly labelled. No missing parts, no return visits, no hassle - just smooth installations that keep your day on track.

THE REAL COST OF GETTING IT WRONG?

A SINGLE CURTAIN HARDWARE FAILURE CAN COST THOUSANDS IN REPLACEMENT AND FITTER DAY RATE LABOUR FEES.

Delays can add over **£2,000+** per week to your project if things do not run smoothly. We've built our reputation by eliminating these risks and helping our customers save thousands in late fees.

NO BUDGET OVERRUNS

MINIMAL DELAYS

ZERO CALLBACKS

Our contract-grade components are engineered for longevity and backed by a 5-year warranty and rigorous quality assurance - ensuring minimal maintenance, reduced lifecycle costs, and less waste.

YOU CAN TRUST US TO BRING **PERFORMANCE AND DESIGN-LED** DETAIL TO EVERY UNIT DELIVERED.

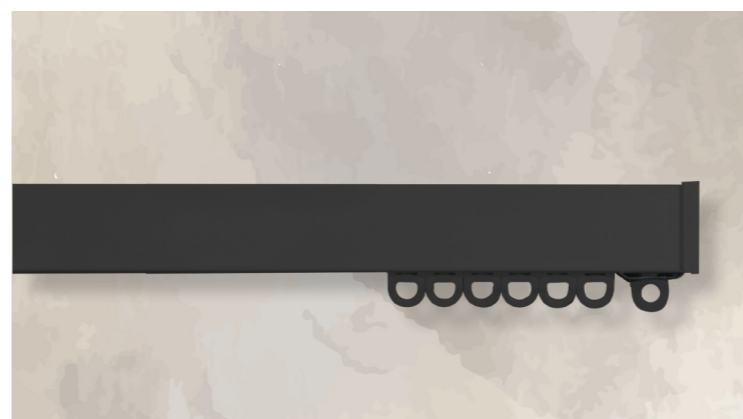

CASE STUDY

CALE CROSS HOUSE

Our client working on a towering 18-story former office block in the middle of a remarkable transformation into apartments in Newcastle's city centre needed strong and reliable metal curtain tracks. We supplied 235 of our finest Aluminium Principal Uncorded Track Kits, Made-To-Measure – a precision-cut, reliable metal profile offering exceptional strength to support long-term use. We made sure to deliver with all the required components in one pack to streamline installation and minimise packaging waste. With 241 apartments, the scale of the project called for our distinct dependability.

*CONTRACT 29MM IS ALSO AVAILABLE
IN STAINLESS STEEL.

Based in Portishead, Somerset, Marina Gardens comprises 127 (one and two-bed) flats in the centre of a regenerated harbour. The property needed Made-To-Measure Contract 28 Pole Kits in Brushed Nickel, with End Caps, Eyelets and short Standard Brackets all included.

Our Contract 28 is something of a go-to pole for use in volume with its design, targeted at handling medium-to-heavy weight curtains, making it ideal for residential settings. We supplied the property with nearly 200 Made-To-Measure kits, labelled for delivery to each of the relevant building floors and with a White Glove Service to ensure product quality upon arrival.

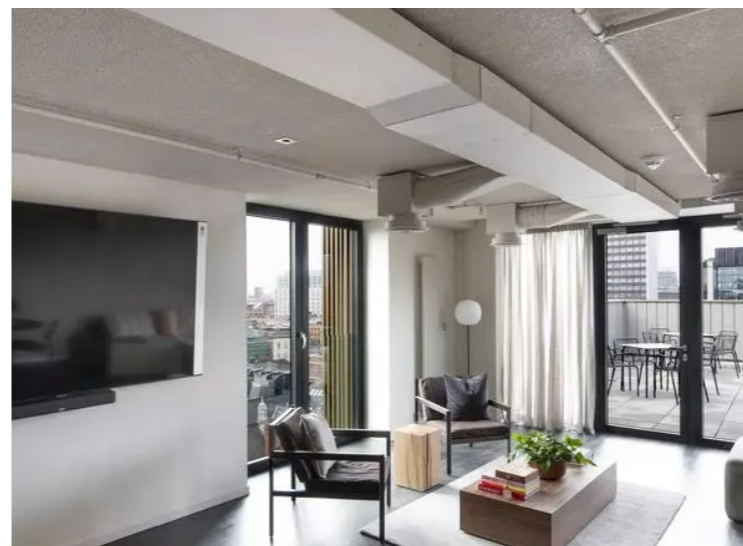

CASE STUDY

KAMPUS APARTMENTS MANCHESTER

Our client needed Black Motiva Metal Tracks for a big conversion in Manchester – converting two former shipping warehouses into loft apartments as part of the much larger Kampus Apartments development, comprising over 500 homes. We supplied 300 of our 6m Motiva tracks, with hundreds of each of the necessary accessories – End Caps, End Stops, Gliders and Brackets. Our bespoke Made-To-Measure Motiva tracks are designed for strength and durability, made from Aluminium, and use a 6mm channel system to ensure compatibility with heavy-duty gliders and accessories. The tracks were handled meticulously all the way through delivery to ensure that they arrived at the customer in the best possible condition.

Ferrum is a Quintain BTR development at Wembley Park in London, comprising 741 homes. The interior fitting-out subcontractor needed Click-in Gliders, Principal End Caps and End Stops and knew that Renaissance would offer them the best quality and reliability. Our click-in gliders are built to save time during fitting, by snapping into place easily and tool-free while our End Caps and End Stops provide a clean professional appearance along with keeping the curtain safe from wear and tear by over-drawing.

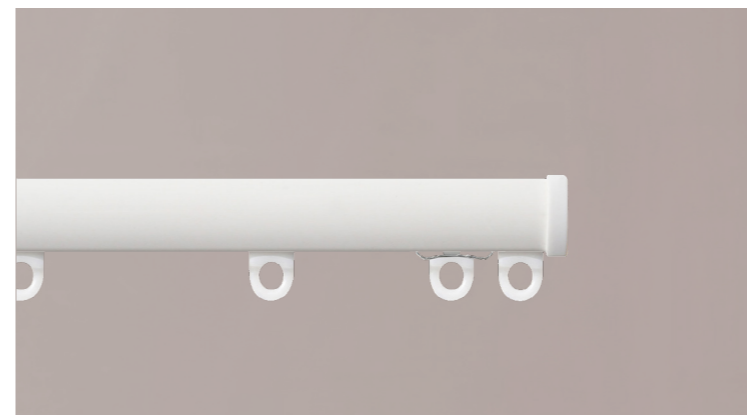

CASE STUDY

WEMBLEY PARADE

A 195-apartment complex in the heart of Wembley Park required a slim, unobtrusive track that would install cleanly and deliver consistent wave folds across wide openings without on-site cutting. We supplied four Made-To-Measure Mini Professional Uncorded Track Kits in White - 2 x 300 cm and 2 x 200 cm – each paired with 4mm SurgeWave® gliders for a crisp, uniform finish.

Each kit was supplied pre-assembled and complete with track, ceiling brackets, gliders, end caps and end stops, cut to size and labelled for its specific location to speed installation and protect the programme. The precise lengths and consolidated packaging reduced site waste and handling.

TESTIMONIALS

“Collaborating with Renaissance has significantly elevated the standard of our smart home installations. Their cutting-edge curtain tracks and automated systems integrate seamlessly with our technology, providing a sleek, user-friendly experience that our clients love. Renaissance not only delivers top-quality products but also brings a level of service and expertise that makes every project smoother and more efficient. Their commitment to innovation and excellence is evident in every interaction, and it’s why they are our preferred partner for window furnishings”

DAN HART - HIGH TECH HOMES ★★★★★

“Renaissance really gets what we need at West Park Care. Their curtain solutions are not only practical and durable for our care settings but also add a touch of elegance. It’s great having a supplier who delivers on quality and understands our specific needs. Always a pleasure working with them.”

TOM PAGE - WEST PARK CARE ★★★★★

“Ensuring the highest quality and functionality in every aspect of our properties is paramount. Renaissance has consistently provided us with not just products, but complete solutions that enhance both the aesthetics and performance of our living and work spaces. Their expert guidance, combined with an impressive product range, allows us to deliver exceptional value to our customers. Choosing Renaissance means choosing a partner committed to excellence and innovation in curtain hardware. It’s a decision that we continue to benefit from project after project.”

OSCAR BROOKS - MODA LIVING ★★★★★

TRUSTED BY...

COMMITTED TO SUSTAINABLE PRACTICE

AT RENAISSANCE, SUSTAINABILITY IS A PRINCIPLE BUILT INTO **EVERY STAGE** OF OUR DESIGN, PRODUCTION AND DELIVERY. AS AN ISO 9001-CERTIFIED SUPPLIER, WE INTEGRATE **ESG ACCOUNTABILITY** INTO **EVERY ASPECT** OF OUR OPERATIONS, FROM RESPONSIBLE SOURCING TO RIGOROUS QUALITY ASSURANCE.

We’re actively progressing along our Net-Zero Carbon Pathway, with strategies focused on energy mapping, embodied carbon reduction, and increased transparency across our supply chain. We recycle all cardboard, plastic, steel, and aluminium waste at our distribution facility - an approach that reflects our wider commitment to circular resource use and low-impact operations.

This mindset shapes product design too. Our Professional Large Curved Track is engineered from recyclable aluminium, delivering durability, high performance, and material efficiency in one specifier-ready system.

Our tracks support daylight blackout of 95%, and provide effective solutions ideal for bedrooms, media spaces, and environments where precision lighting is essential to occupant comfort and functionality.

From enhanced thermal comfort and daylight control to streamlined on-site logistics, our systems help clients achieve energy efficiency, wellness, and sustainability outcomes- without compromising on aesthetics or performance. Renaissance is ready to support your next ESG-driven project with minimal delays, credibility and measurable value.
